To: INSURANCE PROVIDERS

Paintless dent repair has evolved into a mainstream business and continues to show its viability in the body shop industry because of the time savings, quality of repair, and cost effectiveness.

Ultra Automotive Reconditioning has a state of the art facility offering a vast array of services. Our professional specialty is "PDR" (Paintless Dent Removal). Most people are unaware of the larger dents we can repair with virtually flawless results using our unique processes. We repair small to large dents on a daily basis that range from \$75.00 to \$500.00 in cost, with no filler or paint. These repairs, done by a standard body shop, often cost from 2 to 3 times our price to perform.

Our goal is to provide the best professional level of service to your customers with the PDR process. This is a "Win / Win" situation because the insured vehicle can often be repaired at a cost under the deductible and the insurance provider will save on a claim while helping expedite their customer's repair work.

Please refer all minimal damage repairs to Ultra Auto Recon and we can assess the repair to see if it is a candidate for our professional PDR process.

Please visit our website at www.ultraautorecon.com to view before and after photos of dents we have repaired. You can also E-Mail any photos of the damaged area to steve@ultradenttools.com.

Sincerely,

Steve Hopf, President
Ultra Auto Recon
